OBJECTIVE

Hello, My Self MD Masud Sarder. I've been done the diploma from programming-hero Full Stack development, I have been working in the web development sector for the last one year and I have done many separate projects, my area of interest is for a full stack web development but right now currently I am focusing on to the FRONTEND Development

SKILLS

Front End :	• Tailwind CSS	• JavaScript	• React
Back End :	• Express	• Node Js	• Stripe
Tools :	• Firebase	• GitHub	• TanStack Query
DataBase :	• Mongo DB		

PROJECT

1. Restaurant Management Single Page With React

[VIEW](#) [FRONTEND](#) [BACKEND](#)

when anyone start a new restaurant business he can use restaurant management website add food to update food and delete, it's built with react.js mongodb. and express.js for a user friendly experience

- Here I have added a functionality where most cell curry food can be seen
- Developed a secure login and registration system with relevant error message UI show
- implemented environment variables to secure firebase config keys and mongodb credentials

2. Contest-Hub Roll Management

[VIEW](#) [FRONTEND](#) [BACKEND](#)

This website actually has different Roll Management System it's built with react.js, mongoDB, Tanstrack Qurary, express.js (Stripe) payment getway for a user friendly experience

- User can send Host request and User change User Profile
- User Can See dynamically view the Contest Date Line is Remaining Date
- Participant User Register the Contest See The Participant Amount and Winner Price Amount
