OBJECTIVE

Aspiring Backend Developer with 10 months of hands-on experience in building and maintaining scalable APIs and server-side applications using Node.js, Express.js, MongoDB, and Mongoose. Strong foundation in RESTful API development, secure authentication (JWT), and modular architecture. Adept at integrating backend logic with modern frontend frameworks like React and Next.js. Passionate about writing clean, maintainable code and continuously improving through real-world project work and professional collaboration. Seeking a challenging backend role where I can contribute to building robust systems, optimize backend performance, and grow as a developer within a fast-paced engineering team.

PROFESSIONAL EXPERIENCE

Silicornya LTD, Dhaka, Bangladesh (Junior Front-End Developer) On-Site Full Time OCT-24=<Present/>

- Fix the previous project error or add a new Feature
- Company Website Dashboard
- School Management Website
- Full Client Website Control In Dashboard

SM Technology, Dhaka, Bangladesh (Junior Backend Developer – On-Site, Full-Time)

Project: Sports Mentoring System

Developed a role-based web app where Admins invite Coaches, and Coaches upload courses and guides for Athletes.

- Built RESTful APIs using Node.js, Express.js, and Mongoose.
- Implemented JWT authentication and role-based access (Admin, Coach, Athlete).
- Managed secure video upload and storage using AWS EC2 and S3.
- Collaborated with frontend developers for seamless API integration and data flow.

SKILLS

Front-End : JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, Tailwind CSS

Back-End : Node.js, Express.js, RESTful APIs

Tools : GitHub, Firebase, Git, VS Code, Postman

Database: MongoDB, Mongoose

Soft Skills: Clear communicator and proactive problem solver, Strong leadership and teamwork

PROJECT

1. BookShop

[VIEW](#) [FRONTEND](#) [BACKEND](#)

Book Store is a role-based e-commerce app for buying and selling books, featuring secure JWT authentication and smooth product management. Built with ReactJS and TailwindCSS, it delivers a responsive UI and user-friendly

- Role-Based Access Control assigns 'Customer' by default with optional 'Admin' roles
- Efficient Product Management streamlines book listings for buyers and sellers
- The dashboard includes all users and a revenue chart for clear insights.

Tech stack: ReactJS, ExpressJS, Mongoose, MongoDB, Tailwind CSS, Vercel for host

2. Scholling

[VIEW](#) [FRONTEND](#) [BACKEND](#)

On this platform, students can search for the best tutors based on their favorite subjects and send a request for personalized tutoring. The top tutors are available across a wide range of subjects, using NextJS, NodeJS, Mongoose, and TypeScript

- Enabling tutors to accept or decline student inquiries,
- With dashboard notifications and seamless payment initiation upon acceptance.
- Efficiently manages courses and tutoring requests,

Tech stack: NextJS, ExpressJS, Mongoose, MongoDB, Tailwind CSS, Vercel for host

3. Restaurant Management

[VIEW](#) [FRONTEND](#) [BACKEND](#)

when anyone starts a new restaurant business. He can use a restaurant management website to add food To update and delete food, it's built with react.js mongodb. and express.js for a user-friendly experience

- User can send Host request and User change User Profile
- User Can See dynamically view the Contest Date Line is Remaining Date
- Participant User Register the Contest See The Participant Amount and Winner

Tech stack: ReactJS, ExpressJS, Mongoose, MongoDB, Tailwind CSS, firebase
